Reaction Journey

Discover reactions. Follow your favorites. Share the journey.

Reaction Journey is an independent fan community for people who enjoy Missioned Souls. It brings reactions, favorite channels and songs, and the band's official video archive together in one place, making it easier to find something worth watching and share it with other fans.

What you can do

Find reactions and official videos. My Feed helps you discover reactions to Missioned Souls, while MS Journey brings together the band's performances, Shorts and vlogs. Official uploads that appear in My Feed are clearly labeled.

Choose how you explore. You can sort reactions by views, ratings, discussion or channel size. Newest reactor and Highest ranked reactors each show the latest matching reaction from every channel, so one reactor does not fill the list.

Follow the channels and songs you enjoy. Follow individual reactors and songs to shape your feed, or use Follow All Reactors to add every matching channel across the directory's pages. You can also hide channels or clear your reactor follows.

Keep different Following groups. Save your favorite combinations of reactors and songs, then choose a saved group whenever you want to switch. View followed reactions on My Feed takes you straight to the videos that match your follows.

Bring your YouTube subscriptions with you. If you choose to connect YouTube, you can review matching reactors in batches of up to 100 before following them here. This never changes your YouTube subscriptions, and you can disconnect at any time.

Share what you think. Rate a reactor from 1 to 100 or open Discuss to join its conversation. Individual videos have their own ratings from 1 to 5, so you can distinguish a favorite channel from a particularly good reaction.

Explore the band through MS Journey. Browse the official archive by year, playlist or collection, and use search and filters to find a song or performance. Top 10 collections highlight popular videos and view growth where recorded history is available.

Make the experience your own. Save Favorites, track your watch status and keep reusable Saved Views. You can personalize your profile and layout, join chats, suggest missing reactions, and earn Contribution Points and badges for helpful participation.

Use the website or install the app. Reaction Journey works on PCs, Android devices, iPhones and iPads. Sign in with email or Google, and use the same account whether you browse the website or install its web app.
