MEMBER OVERVIEW

Discover reactions. Follow your favorites.

1. Explore

1.1 Find something to watch: My Feed brings together reactions and clearly labeled official uploads. MS Journey organizes the band's official videos separately.

1.2 Shape your feed: Search, filter, and sort. Save Favorites, track watch status, and keep reusable Saved Views.

1.3 Follow what you like: Follow reactors or songs, save private Following groups, and switch between them.

1.4 Join the community: Rate videos from 1 to 5 and reactors from 1 to 100. Comment, reply, join chats, and earn Contribution Points for helpful participation.

2. A few things to know

2.1 YouTube import is optional: Connect with separate read-only permission, review matches in batches of up to 100, and confirm whom to follow. It never changes your YouTube subscriptions.

2.2 Coverage can be incomplete: Counts and video statistics are snapshots. Metadata cannot confirm what a video contains.

2.3 Get help: Search the in-app Help page for current steps. Use Contact or email contact@reactionjourney.com. Never send passwords or API keys.

3. Get started

3.1 Sign in: Sign in with Google or request an email sign-in link at reactionjourney.com. Installation is optional; your account choices follow you across devices.
