APP GUIDE

Get started and find your feed.

1. Sign in and navigate

1.1 Sign in: Choose Continue with Google or Email me a sign-in link. For email, open the newest link sent to the address you entered. Your first verified sign-in creates your account.

1.2 Desktop and phone: Use side navigation on desktop. On phone, use bottom navigation and More. Your avatar opens My Profile & Activity.

1.3 Install (optional): Use Install app when offered, or follow your phone's Add to Home Screen steps. Installation does not create another account.

2. Find videos in My Feed

2.1 Search: Open the magnifying glass to search titles, reactor channels, and known song names. Include Shorts and Customize feed offer filters.

2.2 Choose a feed: All reactions is the general feed; New today includes newly discovered or newly published videos; Following matches your follows; Favorites contains starred videos; Community finds contains accepted submissions.

2.3 Sort: Newest uploads uses publication date. Highest rated uses video ratings. Most discussed uses comment counts. Reactor size uses subscribers. Most viewed ranks reaction videos by recorded views and excludes official Missioned Souls uploads.

2.4 One per reactor: Newest reactor and Highest ranked reactors show each channel's latest video matching your filters. They use first-reaction date and community reactor score, respectively.

2.5 Save a video: Use the star for Favorites and the watch-status control to track progress. Saved Views remember filters and layout; they are not frozen result lists.

3. Follow reactors and songs

3.1 Reactors: Search the directory, choose a sort and page size, then select + Follow. Discuss opens channel comments and a 1-100 reactor rating. More contains Hide and Recommend removal.

3.2 Bulk follow: Follow All Reactors applies across matching results on every directory page, skipping hidden and already-followed channels. Clear All Following removes reactor follows after confirmation; song follows and ratings remain.

3.3 Following groups: Save reactor and song follows as a private group. Choose a saved group and Switch group to activate it. Changes to the active group save when you switch away.

4. Import YouTube subscriptions (optional)

4.1 Connect and review: Connect YouTube uses separate read-only Google permission. Review matching catalog reactors in batches of up to 100 and confirm selected follows. You can finish after a batch and check for new matches later. Reaction Journey does not change your YouTube subscriptions.

4.2 Imported follows: Imported follows are saved in a separate system-managed Following group named YouTube imports. This keeps them separate from your active personal follows.

4.3 Manage the connection: Manage YouTube connection can disconnect and delete tracked imported follows. Manual follows, ratings, Favorites, and hidden choices remain.

5. Clear follows or reset choices

5.1 Clear reactor or song follows: Reactors → Clear All Following or Following → Reset all reactor follows clears reactor follows only. Reset all song follows clears songs only.

5.2 Master Reset: Following → Advanced: Master Reset clears reactor and song follows, hidden reactors, and reactor ratings. It preserves video ratings, performer follows, Favorites, watch status, points, account settings, and saved groups. Read the confirmation before proceeding.

6. Explore MS Journey and participate

6.1 MS Journey: Browse by category or collection and search by song, place, or title. Use Source and Include Shorts filters. Top 10 view-growth rankings need suitable dated statistics; an empty list can mean history is insufficient.

6.2 Discussions: Rate a video from 1 to 5, comment, or reply. Trusted Members post directly; other posts wait for moderator review. Reactor ratings and discussions are separate from video ratings and discussions.

6.3 Chat and profile: Use Chat Rooms and Mentions to join conversations. My Profile & Activity lets you update your display name and profile image.

7. Keep current and get help

7.1 Keep current: When an update notice appears, finish unsaved edits before updating. If the interface looks outdated, refresh; on Windows, Ctrl+Shift+R forces a fresh load. Account data, community features, and playback require an internet connection.

7.2 Get help: Open Help and search an exact feature name for current steps. Use Contact or email contact@reactionjourney.com. Include the exact error, when it occurred, and a direct video or channel link. Do not send passwords, API keys, or Google tokens.

7.3 Good to know: The catalog may be incomplete; counts and statistics are snapshots, and metadata cannot prove video contents. Reaction Journey is an independent fan community.
